Profile and Portfolio

- <https://au.linkedin.com/in/yijia-wang-5bb147321/>
- <https://surl.li/hvavyn>

Skills

- **Interactive Media Development:** Unity, C#, AR/VR Interaction, Interactive Systems, Spatial UI, Prototyping, Multimedia Applications
- **Web & Software Development:** JavaScript, Python, Java, C++, Git, Front-End Development,

IT Multimedia Specialist and Interactive Media Developer with experience designing and building interactive digital products, immersive media systems and user-centred multimedia experiences. Skilled in Unity, C#, web front-end development, UI prototyping, 3D content pipelines, audio-visual production and HCI evaluation. Experienced in combining software development, interaction design, AR/VR, 3D environments, sound design and cloud-based platforms to deliver practical and engaging multimedia systems across research, education, creative technology and product contexts.

Education

- | | |
|---------|---|
| 2026-06 | Master of Computing (Advanced): Human-Centred Computing
<i>The Australian National University - Canberra, ACT</i> |
| 2023-12 | Bachelor of Information Technology: Games And Interactive Media
<i>Monash University - Clayton, VIC</i> |

Experience

- | | |
|-------------------|---|
| 2025-06 - 2026-06 | Researcher (HCC/Sound and Music Computing)
<i>ANU SMCCLAB (Australia), Canberra, ACT</i> <ul style="list-style-type: none">• Designed and built an interactive multimedia prototype using Unity and Meta Quest, transforming everyday objects into AR-based musical interfaces.• Developed multimedia interaction flows combining object-attached UI, hand-gesture input, spatial anchoring, visual feedback and real-time sound control.• Integrated 3D interaction design, HCI research and audio-mapping logic to create a learnable and performance-ready immersive media experience.• Produced technical documentation, user-study materials and evaluation outputs to refine usability, interaction reliability, feedback clarity and live demonstration workflow. |
|-------------------|---|

- API Integration,
Authentication, AWS
- **UI / UX & Product Design:**
Figma, Advanced
Prototyping, UI Systems,
Interaction Flows, User-
Centred Design, Usability
Testing, HCI Evaluation
- **3D / Visual Media:** Maya,
Substance Painter,
Cinema 4D, 3ds Max, 3D
Environment Design,
Projection Mapping,
Computer Graphics,
Photoshop
- **Audio / Video Production:**
Pure Data, Reaper,
FMOD, Audacity, Sound
Design, Field Recording,
DaVinci Resolve, OBS
- **Workflow & Collaboration:**
Jira, Trello, Miro, Technical
Documentation,
Stakeholder
Communication, Cross-
Functional Collaboration

Professional Working

2025-08 -
Current

Co-Founder / Full-Stack Developer

*Eastern Suburbs Professional Cleaning (Australia),
Melbourne, VIC*

•

Led product design and front-end development for a
cloud-based cleaning quote platform supporting
contact-free service requests through photos and
customer requirements.

•

Designed and implemented multimedia-friendly user
flows including multi-step quote forms, image upload,
service selection, user dashboard and merchant
onboarding.

•

Integrated authentication, cloud hosting/storage
and backend API data flow, deploying the platform
through AWS and iterating based on usability and
business workflow needs.

2023-09 -
2024-03

Interaction Designer

ByteDance (China), Beijing, China

•

Designed PC web UI screens and interaction flows for
an internal data-centre cloud platform, translating
business requirements into clear interface structures.

•

Created digital media assets including interface
layouts, icons, posters and visual elements to support a
consistent platform-wide design language.

•

Collaborated with product managers and
development teams on design handoff, interface
delivery, progress tracking and iterative UX
improvements.

2022-06 -
2023-06

Multimedia Specialist / Unity Game Developer

Monash University (Australia), Melbourne, VIC

•

Led a 4-person team to deliver Unity-based immersive
multimedia projects, including “Burial Heart” and “The
Secret Recipe,” from concept development to final
presentation.

•

Designed interactive 3D environments, gameplay
flows, spatial storytelling, user-facing experience goals
and audio-visual presentation elements.

•

Managed production workflow using Trello, Miro and
Jira, while producing playthrough and promotional
videos with DaVinci Resolve.

2020-11 -
2021-07

3D Mapping Designer

GengDan Institute of Beijing University of Technology (China), Beijing, China

- Delivered a 5-minute 3D projection and light-mapping piece for a public showcase, combining 3D scene design, motion timing and visual storytelling.
- Created 3D assets, textures, lighting transitions and final render outputs using Cinema 4D, Maya, 3ds Max and Substance Painter.
- Collaborated with a mentor and a 10–15 person production team, supporting production planning, show playback preparation and audience feedback collection.

2022-08 -
2023-07

Product Developer

New-ERA AI Retirement Program Intern (Australia), Melbourne, VIC

- Contributed to an AI-enabled aged-care innovation program exploring future service concepts, user needs and digital experience opportunities.
- Developed and presented a feasible digital product proposal combining front-end/back-end design thinking, AI-assisted experience design and human-centred service planning.
- Collaborated in a 5-person multicultural team to research, prototype and communicate product concepts in English.

Technical Projects

Computer Graphics Rendering Competition – ANU

- Developed a custom computer graphics rendering project focused on high-quality image output through scene composition, lighting, materials, camera control, reflection effects and rendering-pipeline refinement.

Java-Based Digital Feedback App – ANU

- Built a Java-based digital feedback application applying object-oriented programming, UI logic, data structures, parser/tokeniser logic, AI assistant features, testing and debugging.
